

2U Rackmount Chassis with 4 Drive Bays and PS/2 350W 80PLUS ATX PSU for micro-ATX Motherboard

Introduction

The **RCK-204MR** is a 2U Rackmount chassis which is designed with a depth of 450mm (17") only, thus providing an ideal solution for those applications where the chassis depth can make or break a project. The **RCK-204MR** can fit a PS2 size power supply which is much cheaper compared to the ordinary 2U power supply. As such user can have more flexibility in choosing the power supply for this chassis. The chassis can be integrated with micro ATX motherboards or mini-ITX boards

Exceeding the drive capacity of most 2U chassis, the **RCK-204MR** can support up to (5) drive bay, (4) low-profile PCI slots for additional peripherals. Two 8cm ball bearing fans ensure excellent airflow when faced with a heat sensitive application.
